

SiteProtector

Internet Security Systems (ISS) SiteProtector™ centralized management system provides scalable, centralized security management and analysis capabilities for ISS' broad array of security products and select third party devices. SiteProtector is the only enterprise-capable security product that unifies the management and analysis of network, server, and desktop protection agents and appliances, providing central visibility and control for the Proventia® Enterprise Security Platform (ESP). Customers can control, monitor and analyze their security protection systems from one central site with a minimum of staff and operational costs.

Enterprise Class Scalability
